

A BETTER WAY TO DESIGN MEDICAL DEVICES

The Executive's Perspective

YOU HAVE A VISION AND PLAN FOR YOUR COMPANY

You believe in your company. It's full of promise and moving in the right direction. You have a vision and a plan to get there. Now it's time for takeoff.

But there are a few forces that drag your momentum.

You need to go to market faster to reduce time to revenue. You need to be innovative without incurring unnecessary risk. Your plan depends on flawless execution.

REMOVE ALL FRICTION FROM YOUR DESIGN CYCLES

Imagine if you could remove all friction from your design cycles and deepen your partnerships across the value network.

What could your teams create with advanced collaborative design tools available anytime, anywhere?

How fast could your team deliver if you had a platform to run an efficient medical device design process?

With the **3DEXPERIENCE®** platform on the cloud, your organization has advanced capabilities for bringing innovation to life.

You're choosing to:

- Lead with innovation
- Reduce risk
- Future-proof your organization

LEAD WITH INNOVATION

Break down internal barriers — no more silos. Synergies happen when your operations and product teams collaborate on the same platform. Innovation bursts forth.

Break down external barriers. Easily exchange information with the rest of the value network. Align with a larger partner ecosystem. Collaborate seamlessly across organizational lines in real time.

Cultivate value. Capture and repurpose the design intelligence generated by your teams. Forge relationships between projects to rapidly deliver new innovations.

Embrace cutting-edge technology. Give your people access to industry-leading design simulation, manufacturing and data analysis capabilities.

REDUCE RISK

Protect your margins. Get to market faster. Minimize the delays and costs of late-stage design changes through greater collaboration with stakeholders.

Be agile. Respond nimbly to shifting requirements and market demands faster than your competition. Reduce time to market and build momentum.

Rely on a proven platform. Use the solution trusted by thousands of medical device companies of all sizes, from a provider with a 40-year track record. Take risks in your designs, not on your business platform.

Exchange information securely. Stakeholders can seamlessly review and markup designs on any device. Communicate product data across and beyond your organization — while keeping your IP secure on the cloud.

FUTURE-PROOF YOUR ORGANIZATION

Innovate sustainably. Create, execute, repeat. Steadily support an accelerating productivity rate as the company shifts into higher and higher gears.

Scale according to plan. Adopt solutions that foster business maturity and unbridled growth, no matter how high your sights are set.

Capture knowledge for continuity. Embed requirements, design intent and even the designer's thought process directly into the design itself. Retain and quickly access institutional knowledge.

Enable a distributed workforce. Remove any geographic barriers to working with the best talent, wherever they are in the world.

CONCLUSION

Unleash innovation while reducing risk. Become unstoppable using the **3DEXPERIENCE** platform on the cloud. It's the only solution that connects the entire value network in a way that accelerates the process and improves the medical device.

Deliver superior products and support your business growth with these three roles on the **3DEXPERIENCE** platform:

Collaborative Industry Innovator

Collaborative Designer

3D Product Architect

READY TO EXPERIENCE IT FOR YOURSELF?

Request a tour of a live demo environment. You'll learn how to mock up a multi-CAD medical device through a browser, how multi-stakeholder collaboration works, how to fully leverage the value network and more.

Our 3DEXPERIENCE® platform powers our brand applications, serving 11 industries, and provides a rich portfolio of industry solution experiences.

Dassault Systèmes, the 3DEXPERIENCE Company, is a catalyst for human progress. We provide business and people with collaborative virtual environments to imagine sustainable innovations. By creating 'virtual experience twins' of the real world with our 3DEXPERIENCE platform and applications, our customers push the boundaries of innovation, learning and production.

Dassault Systèmes' 20,000 employees are bringing value to more than 270,000 customers of all sizes, in all industries, in more than 140 countries. For more information, visit www.3ds.com.
